

# Poster Presentations

---

- 1. Expression analysis of WOX (Wuschel-related homeobox) genes in rice (*Oryza sativa* L.)**  
Rico Gamuyao, Evelyn Mae Tecson-Mendoza, Antonio Laurena, and John Bennett
- 2. Isolation of the putative phytase cDNA from germinated rice seeds and its expression in *Escherichia coli* BL21(DE3)**  
Jose Ramon Planta, Shigeki Hamada, Hiroyuki Ito, and Hirokazu Matsui
- 3. Molecular and morpho-agronomic characterization of improved *Mestizo1* hybrid rice parental lines with bacterial blight resistance**  
Joan Marie S. Agarcio, Neil Nemesio A. Baliuag, Arlen dela Cruz, Samuel Ordoñez Jr., Grace Amar, Fortunato Suratos, and Edilberto Redoña
- 4. Simultaneous detection by reverse transcription-PCR of Rice Tungro Spherical Virus (RTSV) and Rice Tungro Bacilliform Virus (RTBV) from infected rice leaf samples**  
Reynante L. Ordonio, Jerry S. Serapion, Gabriel O. Romero
- 5. Detection, isolation and partial characterization of a potyvirus infecting oil palm (*Elaeis guineensis*)**  
Merle B. Palacpac, Lealyn A. Ramos, Fe M. dela Cueva, Antonio C. Laurena, Laurie A. Salumbides, Eric G. Dinglasan, Neil H. Tan Gana, and Filomena Sta Cruz
- 6. Novel design and assembly of a fused double gene construct of 1-aminocyclopropane-1-carboxylic acid (Acs2) synthase and Papaya Ringspot virus (PRSV) coat protein genes for RNA interference (RNAi)**  
Neil H. Tan Gana, Antonio C. Laurena, Evelyn Mae Tecson-Mendoza, and Roberta N. Garcia
- 7. Inulin availability in transgenic rice for increased iron absorption**  
Rhodora R. Aldemita, Salim Al-Babili, and Peter Beyer
- 8. Wheat proteins modified by Umamizyme and glutaminase for added value and utilization**  
Marissa Villafuerte Romero and Chi-Tang Ho
- 9. Cloning, expression and purification of a chromoprotein from the sea anemone, *Heteractis* sp.**  
Marvin A. Altamia and Cynthia P. Palmes-Saloma
- 10. cDNA library constructed from the venom duct of marine gastropod *Hastula lanceata* (Linné, 1767) reveals novel sequences**  
Maria Aiko Angela A. Diaz, Francisco M. Heralde III, Baldomero M. Olivera, and Ameurfina D. Santos

- 11. Shotgun cloning of toxin genes in a marine gastropod *Gemmula speciosa* (Reeve 1843)**  
Francisco M. Heralde III, Carlo S. Lapid, Gisela P. Concepcion, Baldomero M. Olivera, and Ameurfina D.Santos
- 12. Conotoxin precursor and 16S mtDNA sequences may indicate the mollusc feeding behavior of *Conus furvus*, Reeve**  
Samuel S. Espino, James A. Villanueva, Baldomero M. Olivera, and Ameurfina D. Santos
- 13. Molecular phylogeny of Conoidea: a case of applying 16s rRNA gene for high level phylogeny**  
Francisco M. Heralde III, Angela Clarissa D.R. Cantalejo, Maren Watkins, Gisela P. Concepcion, Baldomero M. Olivera, Ameurfina D.Santos, and Virginia D. Monje
- 14. Molecular characterization of the prey field of vermivorous *Conus* species: DNA barcoding of polychaetes**  
Mary Anne Q. Astilla, Francisco M. Heralde III, Gisela P. Concepcion, Baldomero M. Olivera, and Arturo O. Lluisma
- 15. Molecular regurgitate analysis: A technique to elucidate deep sea gastropod diet**  
Francisco M. Heralde III, Mary Anne Q. Astilla, Ameurfina D.Santos, Gisela P. Concepcion, Baldomero M. Olivera, and Arturo O. Lluisma
- 16. Bioactive peptides from *Gemmula speciosa* venom: Isolation, purification and sequencing**  
Ma. Diarey B. Tianero, Glory D. Ranches, Francisco M. Heralde III, Ron Kaiser, Ma. Pamela David, Baldomero M. Olivera, and Gisela P. Concepcion
- 17. Marine natural products heptylprodigiosin and adociaquinone B induce apoptosis in two human breast cancer cell lines**  
John Phillip L. Fadul, Cyril D. Deaño, Eloise I. Prieto, Zenaida P. Bojo, Dennis D. De Guzman, and Gisela P. Concepcion
- 18. Microbial isolate P129-1 from a marine sponge inhibitory to *Staphylococcus aureus* ATCC 12600 is an *Ochrobactrum* sp.**  
Immaculae Jasmin C. Jao, Francisco M. Heralde III, Andrea Roxanne J. Anas, Alice Sertan-De Guzman, Tim Bugni, Chris Ireland, and Gisela P. Concepcion
- 19. Delayed oocyte maturation in mice intramuscularly injected with *Nauclea orientalis* L. bark extract**  
Medolina Fabillo and Florabel Fumar
- 20. Ingested human tyrosinase cDNA persists in the gastrointestinal tract, crosses the placental barrier and is transmitted to mouse embryos**  
Crescens Diane Y. Tiu, Madel Durens, and Cynthia P. Palmes-Saloma
- 21. Cross-reactivity studies between house dust mite allergens and *Ascaris lumbricoides* antigens**  
Gardette R. Valmonte and John Donnie A. Ramos

**22. Simultaneous expression of two antitumor antibodies engineered for heterodimerization**

Maria Aiko Angela A. Diaz, Eduardo A. Padlan, and Ameurfina D. Santos

**23. Identification of a sulfiredoxin (Srx1)- interacting protein in *Saccharomyces cerevisiae* by using high-throughput (HTP) protein interaction assay, the yeast two-hybrid system**

Karen P. Barandoc and Il-Han Kim

**24. Immunofluorescent staining of neurons and glial cells using organic fluorophores and quantum dots**

Laura Andrea B. Rivera, Myka Francesca R. Ababon, and Cynthia P. Palmes-Saloma

**25. A quantitative image analysis for microtiter plate simulation: A practical solution to a perennial problem**

Maria Pamela C. David, Kevin Manansala, Kristine Ann G. Buela, John Philip L. Fadul, Gisela P. Concepcion, and Prospero C. Naval

**26. Continuous and discontinuous B-cell epitope prediction of the apical membrane antigen 1 (AMA1) in *Plasmodium falciparum* and its implications in variant-specific antibody response**

Francesca Diane M. Liu, Eduardo A. Padlan, and Gisela P. Concepcion
